Jessica Charlotte Nicholl

I'm a web designer and front-end dabbler with a passion for beautiful UX. I love crafting responsive websites with intuitive interfaces, and visual identities which delight and captivate users. I'm driven by the need to create, and have a soft spot for anything vector.

EDUCATION

Diploma of Web Development
Yoobee 2013

Through this industry focused course I learnt the best practices and techniques to build feature-rich, database-driven websites that are easy to use and look beautiful. I really enjoy content driven websites with a focus on UX.

Bachelor of design
CPIT 2010

My favourite course components included studio photography, advertising, and communication design. I also loved the nitty-gritty professional practice classes of contract writing, copyright law and licensing. A balanced design education.

EXPERIENCE

December 2013
Zing Design
Junior Web Designer

As a junior designer I work closely with a small team of passionate creatives responsible for wireframe design, component design, and working prototypes. I've implemented workflow tools such as InVision and Trello and contributed to projects such as Spark My Potential for Spark Foundation, Leda, Valley Surveying Company, and RaboDirect.

September 2013
FindSomeone
Design & Marketing
Secondment

I completed a three month secondment for FindSomeone. I worked together with a small team of developers to produce graphic design elements for marketing and sales. I contributed to advertising for Stuff, email newsletters and small web components such as icons and stock photo selection.

December 2011
Trade Me Group LTD
Customer Support
Representative

In this position I obtained invaluable insight to how users connect with websites on a daily basis. This taught me the importance usability and brand relationship. I contributed to improvement through suggestions to improve work systems, processes and procedure.
